**ACTIVITIES FOR QUARTER ENDED
30 JUNE 2022**

- 100% interest acquired in 19.74 km² tenement in the highly-endowed Laverton gold district (Mt Lucky).
- Completion of SAM geophysical survey at the Meekatharra Gold Project.
- Planning for Phase 2 drill program at the Meekatharra Gold Project.
- Mt Forrest work program.
- Additional working capital raised.

MEEKATHARRA GOLD PROJECT (MDX 100%)

Phase 1 of the drilling programme at the Meekatharra Gold Project (refer ASX announcement of 28 June 2021) was completed during the June 2021 quarter. During the June 2022 quarter the Company completed a high-resolution sub-audio magnetic (SAM) ground geophysical survey over the project that identified eighteen target areas. The survey has provided high-resolution mapping of the structures of the project area, which are the controls on gold mineralisation. This information has provided a structural framework and increased the Company's confidence in its geological and structural understanding of E51/1705.

The Company continues to assess information gained from the SAM geophysical survey to interpret the geological prospectivity of the project.

MT FORREST IRON PROJECT (MDX 80.1%)

During the June 2022 quarter the Company and Norton Gold Pty Ltd continued the activities contemplated under the Subscription Agreement as announced on 22 July 2021. Subsequent to the end of the quarter, the Company released a Mt Forrest Project Update on 18 July 2022 summarised below.

During the period, MF1 phase 2 RC drilling was completed comprised of 16 holes for a total of 5,374 m. This infill drilling was intended to enable a Mineral Resource evaluation to be undertaken. Once all DTR results have been returned, a revised geological interpretation accompanied with digital solids of the ore will be updated and then passed onto the independent resource geologist consultant for estimation.

Diamond Drilling commenced early June 2022 with the first hole being completed for 479.1m. The diamond drilling is aimed at providing geotechnical data to determine pit wall angles.

The additional infill drilling will enable the opportunity to update the mineralised ore outlines and complete a new geological interpretation. This new interpretation includes a high-grade ore domain characterised by a cut-off less than 10% Silica and an iron grade greater than 60% Fe from all DTR concentrate assay results received to date. This new interpretation will then be used to undertake a new mineral resource estimation.

Additionally, RC drilling at MF2 comprising 27 holes for a total of 8,457m was completed. The drilling completed phase 2 and 3 focussing on the central and southern area of MF2.

Several DTR assays returned from the southern and central drilling identified a thicker presence of dolerite that crosscuts the iron ridges and magnetite bands.

Approximately 100m further south, the BIF ridges, as mapped, persist at depth with encouraging grades returning several bands but at depth accumulate over 90m down hole width verifying the high-grade magnetite strike continuity.

Surface geological mapping has not been able to identify the extents and the true thickness of a cross cutting Proterozoic dyke which has been intersected along the central MF2 location. The BIF Range is split by this feature however owing to the immense cover, the actual true thickness was unable to be determined by mapping.

MT LUCKY GOLD PROJECT (MDX 100%)

Subsequent to the end of the quarter the Company entered into and completed an agreement to acquire a 100% legal and beneficial interest in granted exploration licence E38/3336 (Mt Lucky). Under the terms of the agreement the Company acquired a 100% interest for a cash payment of \$80,000. The transaction is subject to commercial terms and conditions, including access agreements, typical to an agreement of this nature.

For personal use only

Mt Lucky lies within the Mt Margaret Mineral Field of the north-eastern Goldfields of Western Australia (Laverton Greenstone Belt), approximately 7 km east of the Granny Smith gold mine (plant capacity 3.5 Mtpa) and 12 km southeast of Laverton. The ground has widespread gold anomalism and artisanal-scale gold workings.

TENURE

A total of 8 tenements covering more than 50 km² were held as at 30 June 2022. A list of the tenements and their locations are detailed in Annexure "A".

CORPORATE

During the quarter the Company raised \$1,050,000 from the issue of 21,000,000 fully paid ordinary shares in the capital of the Company.

The Company reviewed project acquisition opportunities during the quarter and to date the Company has not proceeded to acquire any further projects. Reviews will continue during the coming quarters.

The Company's securities were suspended from trading on the ASX on 28 February 2022 and continue to be suspended as at the date of this report. The Company is actively engaged with the ASX regarding the suspension status of its securities. The Company is working through the specific ASX Listing Rule requirements, in respect of its suspension status, in consultation with the ASX and the Company's advisors. The Company remains committed in working with ASX to satisfy the requirements in order to achieving the re-quotations of its securities as soon as possible.

Strategy

The Company's strategy is to continue to pursue new opportunities, realise shareholder value exploring its existing projects with the view to potentially deliver new discoveries and seeking to amalgamate holdings through acquisition and corporate activity.

Capital Structure

The **current** issued capital of the Company is 1,930,697,680 fully paid ordinary shares, with no other securities on issue.

ASX Additional Information

ASX Listing Rule 5.3.1: Exploration and evaluation expenditure during the quarter was \$56,000 comprising desktop geological studies, tenement compliance costs and geological consulting costs associated with the Meekatharra Gold Project. In accordance with the Subscription Agreement exploration and evaluation expenditure for the Mt Forrest Iron Project is incurred by Norton Gold.

ASX Listing Rule 5.3.2: There were no substantive mining production and development activities undertaken during the quarter.

ASX Listing Rule 5.3.5: During the quarter, the Company made cash payments totalling \$87,000 to related parties or their associates. This was the aggregate amount paid to the directors including salary, directors' fees, consulting fees and superannuation.

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
6. By the Company lodging this Appendix 5B, the CEO and CFO declare that the Appendix 5B for the relevant quarter:
 - presents a true and fair view, in all material respects, of the cashflows of the Company for the relevant quarter and is in accordance with relevant accounting standards;
 - the statement given above is founded on a sound system of risk management and internal compliance and control which implements the policies adopted by the Board; and
 - the Company's financial records have been properly maintained and the Company's risk management and internal compliance and control system is operating efficiently and effectively in all material respects.
