RESOURCES

MINDAX has expanded its portfolio of WA uranium interests via a 50-50 exploration joint venture with **Quasar Resources** — an affiliate company of Heathgate Resources, and a collaborative uranium research project with the CSIRO. The joint venture will be operated by Mindax and will target the discovery and economic exploitation of recoverable uranium mineral deposits within the highly prospective Yilgarn region. Applications have also been lodged for additional exploration ground prospective for uranium-copper-gold mineralisation in the Yilgarn region.
