

ASX ANNOUNCEMENT

30 January 2013

ASX Code: MDX

ABN: 28 106 866 442

Corporate Description

Mindax's Mt Forrest Iron Project is progressing through feasibility with a view to mining at the end of 2014.

Mindax is also the greenfields discoverer of a new uranium province near Mukinbudin, Western Australia.

Mindax also has exploration projects based in Western Australia which involve Gold and Copper.

Through technically advanced exploration and an eye for detail, Mindax has successfully built a significant portfolio of 37 mineral exploration and mining tenements covering over 4,000 square kilometres. In addition, Mindax has applications in place for water and infrastructure covering over 2,400 square kilometres in support of the Mt Forrest Iron Project development.

Mindax aims to develop strategic resources through innovative exploration. Projects will be moved to production including via strategic partnerships.

ACTIVITIES FOR QUARTER ENDING 31 DECEMBER 2012

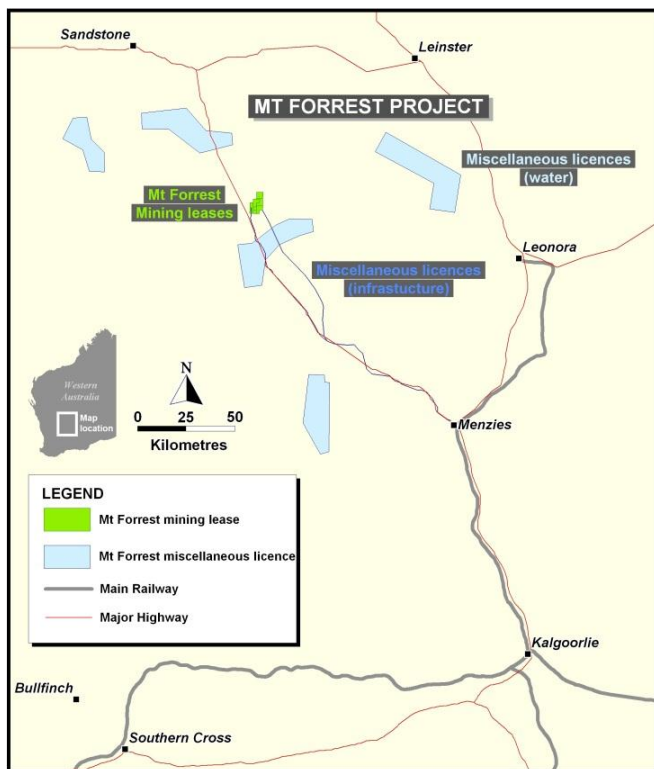

Updates on:

- Mt Forrest Iron Project
- Yilgarn Avon JV Uranium Project
- Yilgarn Avon JV Mortlock Copper/Gold Project
- Meekatharra North JV Gold Project
- Tenure & Tenements
- Corporate

Highlights include:

- Field work commenced at Mt Forrest and Meekatharra North
- Further stakeholder meetings held at Mt Forrest
- Updated equity position for the Yilgarn-Avon JV
- Meekatharra North 2013 field program fully funded under a new JV
- Successful completion of placements to Sophisticated Investors

MT FORREST PROJECT

Overview

Work comprised field reconnaissance and ground clearing for the Detrital Iron Mineralisation drill program, maintaining heritage relationships, advancing environmental studies and reviewing composite gold assays.

Yilgarn Iron Producers' Association very active with independent studies on the proposed upgrade of the Esperance Port.

Detrital Mineralisation

Reconnaissance field work and ground clearing has been completed for the Detrital Iron Mineralisation drill program which commenced on the 15th of January 2013 (refer to the announcement of same date).

Up to 6,000 metres of drilling is proposed to explore for iron reconstituted into a detrital conglomerate on the project (see Figure 1). The detrital material is located off the ridges and is in the form of large flat bodies. This material has the potential to quickly add to the projects iron resources. Scout drilling previously reported intersected vertical thicknesses of up to 24 metres. This work is part of the Proof of Concept for the optimised DSO Scoping Study.

Picture: Drilling for Detrital Iron at Mt Forrest.

Heritage

In accordance with the Cultural Heritage Advisory Committee recommendations, individual stakeholder meetings were conducted by the Company. These meetings provided an

opportunity to communicate the project status and the proposed future exploration and mining works as well as meeting the Company's new MD and CEO, Steve Ward.

The Wutha participated in the Detrital Mineralisation ground clearance program acting as monitors to ensure site avoidance.

Environmental

A Level 2 Spring Fauna Survey took place across the range and no new or rare species were identified. A maleefowl expert also undertook a review of all the project "megamounds". The review confirmed the mounds are extinct and some samples of the residual material were taken for testing. Reports are pending for all surveys.

Infrastructure

Mindax is a member of the Yilgarn Iron Producers' Association (**YIPA**) who commissioned independent study reports for the proposed upgrade of the Esperance Port. The latest study is to determine the economic viability of a 10 million tonne per annum upgrade and associated mining activity. The Economic Impact Study draws to conclusion three major studies carried out by Aecom, which support a modest Esperance Port stage one upgrade as the way forward. The three studies include a Supply Chain Study in October 2012, an Esperance Port Financial Study in December 2012 and an Economic Impact Study in January 2013.

Gold Mineralisation

Following on from previous work announced in the March 2012 Quarterly Activities Report, a total of 1353 samples were submitted for gold assay. The best anomalous 10 metre composite intervals were riffle split producing one metre composites from the bulk samples located at the Mindax bag farm.

The majority of the assays returned from the drill holes represent narrow, up to 3 metre down the hole width intersections above 1 parts per million (**ppm**) (see Annexure A - Table 1 and Figure 2). The majority of the intercepts are from the regolith horizon and deeper intercepts are returned from quartz filled fractured intervals within magnetite enriched banded iron formation. Annexure A - Table 2 comprises collar, survey and additional assay information.

Approximately 168 samples were found to be wet due to rainfall penetrating the neck of the bulk sample plastic bags. As a consequence of the damp samples the entire batch was assayed by Aqua Regia methodology by Perth based laboratory, LabWest. The assay is based on a 25 gram weight. Further work will further look into anomalous intervals demonstrating strong continuity. All wet anomalous samples will be dried at the lab and riffle split for fire assay.

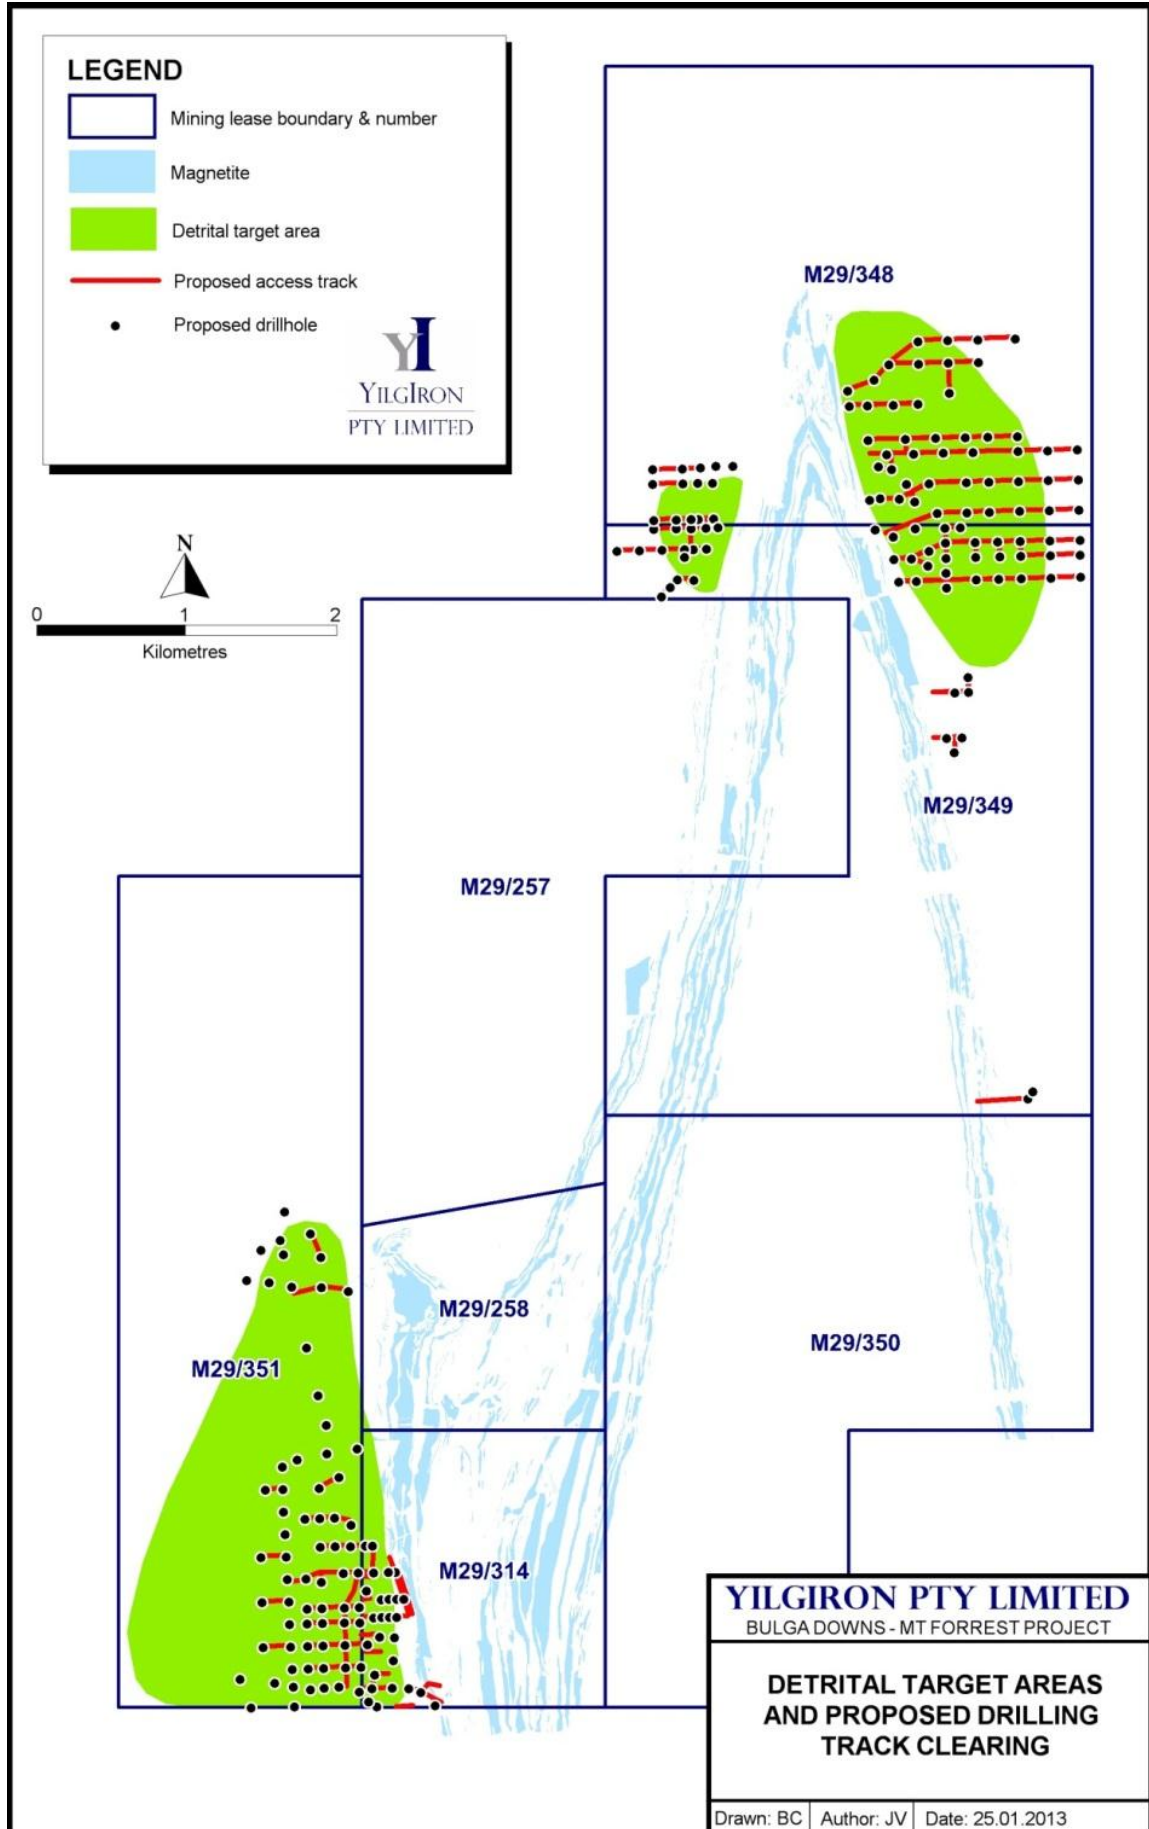

Figure 1: Detrital Mineralisation drill collar location map with drill tracks.

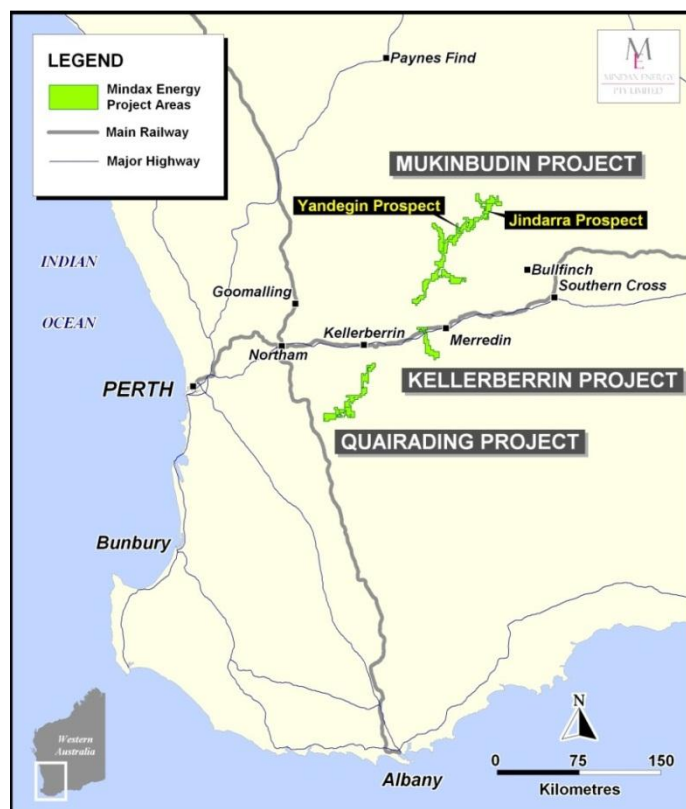

YAJV URANIUM (Uranium)

Mukinbudin, Kellerberrin, Quairading Projects comprising 1,485 km²

Mindax Energy Pty Ltd (77%) and operator with Quasar Resources Pty Ltd (23%)

No field work was undertaken on this project during the quarter. Further discussions were held with Quasar Resources Pty Ltd (**Quasar**) with respect to the future of the Yilgarn-Avon Joint Venture. An updated equity position statement was issued and accepted by Quasar (refer the announcement dated 30 November 2012). The current equity interest of the Joint Venture partners is Mindax Limited 77.17% and Quasar 22.83%. Quasar has also informed Mindax that it will not be contributing financially to the 2013 exploration programs.

Planning and budgeting of the exploration programs for 2013 is continuing.

YAJV MORTLOCK (Copper, Gold)

Mindax Energy Pty Ltd 77% and operator with Quasar Resources Pty Ltd (includes Sipa JV E70/2518-19/21 - YAJV 51% and operator)

Further to the commentary under 'YAJV Uranium Project' above, no activity was undertaken on the YAJV Mortlock Project during the quarter. Planning and budgeting of the exploration programs for 2013 is continuing.

MEEKATHARRA NORTH JV (Gold)

Mindax 100% and operator (JV earn-in phase commenced)

The 2013 field program is fully funded by the \$2.5 million farm-in agreement announced to the ASX on 11 October 2012.

First monies were received from the Joint Venture partner during the quarter. This funding has already been applied to a ground geophysical survey that was completed in mid-January 2013. The geophysical contractor is currently compiling the data ready to be handed over to our geophysical consultants for processing and interpretation. Data should be provided to Mindax geologist during February to begin drill hole planning.

Picture: Ground geophysical survey at Meekatharra North

TENURE

A total of 54 Tenements covering 4,639km² were held as at 31 December 2012.

42 are granted titles: 7 mining leases, 30 exploration licences and 5 miscellaneous licences.

12 are applications for miscellaneous licences related to the Mt Forrest Iron Project.

TENEMENTS

Tenements Applications:

Nil.

Tenements Granted:

Nil.

Tenements Surrendered:

CORPORATE

The Company continues to seek appropriate funding to enable the development of each of its' key commodity projects.

Cash Reserves and Capital Raisings

As at 31 December the Company held cash reserves of approximately \$3.91 million to apply to the Company's project activities and to provide working capital.

A placement of \$1.65M to sophisticated investors subsequent to the end of the quarter (see 'Movements in Capital Structure' below) increased proforma current cash reserves to approximately \$5.56 million.

Meetings of Shareholders

Extraordinary Meeting of Shareholders

The Company convened a meeting of shareholders (**EGM**) on 1 November 2012 to consider the ratification of the allotment and issue of shares; as well as seeking approval for the issue of unlisted options to the Company's Managing Director & Chief Executive Officer. All resolutions put to the meeting were unanimously passed on the requisite show of hands.

2012 Annual General Meeting

The Company convened the 2012 Annual General Meeting of shareholders (**AGM**) on 30 November 2012 to consider the Company's financial accounts, the directors' remuneration report, the re-election of directors, the allotment and issue of shares & options and the conversion of a Convertible Note. All resolutions put to the meeting were passed on the requisite show of hands.

Movements in Capital Structure

Expiry of Unlisted Options

300,000 unlisted employee options with an exercise price of \$0.48 per option expired on 12 October 2012, without exercise.

Placement to Sophisticated Investors

On 15 October 2012, the Company announced it had received binding commitments to subscribe for 29,492,537 shares at \$0.085 per share to raise gross proceeds of \$2,506,866. The placement was subsequently settled on 3 December 2012.

The placement was made to existing and new sophisticated investors and represented a premium to the Company's share price. Funds raised from the placement are being applied to the Company's project activities and to provide working capital.

Subsequent to the end of the quarter, on 8 January 2013, the Company announced it had received binding commitments to subscribe for 16,500,000 shares at \$0.10 per share to raise gross proceeds of \$1,650,000. The placement was subsequently settled on 11 January 2013.

This placement was also made to existing and new sophisticated investors and represented a premium to the Company's share price. Funds raised from the placement will provide additional working capital for the Company.

Issue of Unlisted Options to the Company's Managing Director & CEO

Following the approval of shareholders at the abovementioned EGM, the Company announced on 9 November 2012 that it had issued Stephen Ward 4,000,000 unlisted employee options with an exercise price of \$0.108 per option, expiring 9 November 2015. These options will vest with Dr Ward after 1 year from the date of issue (ie: on 9 November 2013).

Issue of Unlisted Options to the Company's Non-executive Directors.

Following the approval of shareholders at the abovementioned AGM, the Company announced on 10 December 2012 that it had issued the Company's non-executive directors a total of 2,500,000 unlisted options with an exercise price of \$0.11 per option, expiring 10 December 2015. These options will vest after 1 year from the date of issue (ie: on 10 December 2013).

Conversion of Convertible Note

Following the approval of shareholders at the abovementioned EGM, the Company announced on 3 December 2012 that it had converted a convertible note into 4,694,118 fully paid ordinary shares, at a price of \$0.085 per share.

The \$399,000 convertible note was issued on 27 September 2012 to Ms Lai You, an existing shareholder of the Company and related party to non-executive director, Mr Andrew Tsang. Funds raised from the issue of the convertible note were applied to the Company's project activities and provided working capital

Exercise of Unlisted Options

On 20 December 2012 the Company issued 2 ordinary shares from the conversion of options with an exercise price of \$0.35 per option and an expiry date of 31 May 2015.

Capital Structure

The **current** issued capital of the Company is as follows:

Number Quoted	Class
247,303,568	Fully Paid Ordinary Shares.

Number Not Quoted	Class
1,750,000	Employee options with an exercise price of \$0.45 per option, expiring 30 September 2013.

Number Not Quoted	Class
1,750,000	Employee options with an exercise price of \$0.60 per option, expiring 30 September 2014.
2,323	Options with an exercise price of \$0.35 per option, expiring 31 May 2015.
4,000,000	Employee options issued to the Company's Managing Director & Chief Executive Officer, with an exercise price of \$0.108 per option, expiring 9 November 2015.
2,500,000	Options issued to Non-executive directors, with an exercise price of \$0.11 per option, expiring 10 December 2015.

Top 20 Shareholders

The **current** top 20 shareholders of the Company are as follows:

COMPETENT PERSONS' STATEMENT

In relation to the YAJV, Dr Katrin Kärner is a member of the Australasian Institute of Mining and Metallurgy (MAusIMM) and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity to which she is undertaking to qualify as a competent person as defined in the 2004 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Dr Kärner is a full-time employee of Optiro Pty Ltd, and the Company holds a prior consent to include the matters based on her information in the context in which it appears in this report.

In relation to the Mt Forrest Iron Project, the information in this report that relates to Mineralisation, Exploration and Drilling Results is based on information compiled by Mr John Vinar who is a member of the Australasian Institute of Mining and Metallurgy, with more than 5 years' experience in the field of activity being reported on. Mr Vinar is a full-time employee of the Company and has sufficient experience which is relevant to the style of mineralisation and type of deposit and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". The Company holds a prior consent from Mr Vinar to include the matters based on his information in the context in which it appears in this report.

Also in relation to the Mt Forrest Iron Project, the mineral estimates have been completed by Mr Michael Andrew who is a member of the Australasian Institute of Mining and Metallurgy (MAusIMM) and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity to which he is undertaking to qualify as a competent person as defined in the 2004 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Andrew is a full-time employee of Optiro Pty Ltd, and the Company holds a prior consent to include the matters based on his information in the context in which it appears in this report.
